About the Forum

The Forum for Youth Investment provides products and services to help leaders improve partnerships, policies and practices to change the odds so all young people are ready for college, work and life. These products and services are based on best practices in youth development and on our experience working with hundreds of communities around the country since our founding in 1998.

Planning and Partnering
for Impact

About the Forum's Weikart Center

David P. Weikart Center for Youth Program Quality is a leader in empowering education and human service leaders to adapt, implement and scale best-in-class, research-validated quality improvement systems to advance child and youth development. Training and technical assistance in quality improvement system design, effective performance data and lower stakes accountability has helped OST networks across the country be successful, scale-able and sustainable. The Weikart Center is a critical part of the Forum for Youth Investment's overall effort to build leadership capacity to advance readiness and equity.

Strengthening Practices
and Programs

Cognitive Development

In this workshop, we lay the foundations and self-awareness of our own cognitive development. What we are calling “cognitive skills” are the core skills the brain uses to think, learn, remember, problem-solve, and pay attention—skills which are also related to motivation and impulse control. Cognitive development is the continuing development of those skills from birth through adulthood. The purpose of this workshop is to enhance our practices as staff who support initiative and problem-solving skills in the youth we serve.

Initiative (capacities to take action, sustain motivation, and persevere through challenge toward an identified goal) and problem solving (abilities to plan, strategize, and implement complex tasks) are two of the six social-emotional learning (SEL) domains outlined in *Preparing Youth to Thrive: Promising Practices in Social and Emotional Learning*.

Commonly referred to as the *Thrive Guide*, this publication outlines the research and findings generated from a partnership with the Susan Crown Exchange, the David P. Weikart Center for Youth Program Quality, the University of Illinois Urbana-Champaign, and staff teams from eight exemplary out-of-school time programs focused on social-emotional skill building with opportunity youth. The *Thrive Guide* is an integrated set of stories that reveal a framework of the youth experiences and staff practices needed for effective SEL to occur within youth programs.

More information about the *Thrive Guide*—including a free digital download of the publication—can be found at selpractices.org.

The Brain and Learning

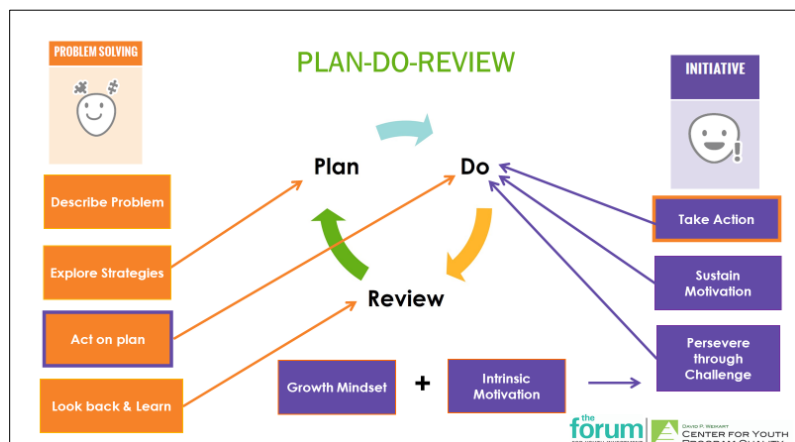

When we think of cognitive development, we typically think of the brain and learning. The front part of the brain is most closely associated with higher order thinking, problem solving, and learning, although the entire brain is integrated and is always working together. A popular, convenient way to categorize areas of the brain is to think of the brain as having three parts:

1. Pre-frontal cortex, or the front part of the neocortex, for rational thinking
2. The limbic brain—where key emotional or feeling processes are centralized
3. The brain stem or, as it is referred to on this slide, the reptilian brain, which regulates basic survival functions like breathing and heart rate.

However, we want to stress that these areas of the brain all affect one another and are connected to one another—you can’t disconnect learning from your social and emotional experiences! When people are under stress or in fear, their reptilian brain kicks in and overrides their ability to engage their pre-frontal cortex, impairing their ability to think clearly and learn.

INITIATIVE		Capacities to take action, sustain motivation, and persevere through challenge toward an identified goal.	
	Key youth experiences <ul style="list-style-type: none"> • Youth set ambitious and realistic goals. • Youth develop and sustain motivation by doing work that matters to them. • Youth have experiences persevering through the ups and downs of difficult work. 	Staff practices <ul style="list-style-type: none"> • Staff provide ongoing assistance to help youth develop motivation within the work. • Staff encourage youth to persist through challenging work, making sure that the effort behind youth’s achievement is recognized. 	
PROBLEM SOLVING		Abilities to plan, strategize, and implement complex tasks.	
	Key youth experiences <ul style="list-style-type: none"> • Youth engage in projects that involve organizing actions over time. • Youth learn through cycles of strategic planning, execution, responding to emergent problems, trial and error, and reflection on outcomes. • Youth reflect on how outcomes of their work provide information that helps build and verify youth skills. 	Staff practices <ul style="list-style-type: none"> • Staff provide sufficient structure to youth-driven projects. • Staff create opportunities for youth to observe models of successful work. • Staff provide assistance, as needed, to help youth learn and solve problems on their own. • Staff offer youth opportunities for reflection on project outcomes. 	

Plan-Do-Review

The Forum for Youth Investment's Weikart Center is named for David P. Weikart, who founded the HighScope Educational Research Foundation following his launch of two seminal projects in the late 1960s. The first project was the Institute for IDEAS, a summer camp program for high school students. The second was the Perry Preschool Project, a longitudinal study on the benefits of quality early childhood education.

Central to both of these projects was a pedagogical approach to supporting young

people's development in learning environments. Although this is sometimes spoken of as simply "active learning," active learning was only one aspect of a sophisticated approach to engaging youth. When Dr. Weikart was preparing to retire as CEO of HighScope in 2000, he emphasized that while active learning was important, Plan-Do-Review was at the heart of his work. Creating and carrying out a plan fosters a sense of agency, initiative, and accomplishment, and helps young people regulate themselves to work toward a goal. More recently, a major synthesis of research on learning and development by the Chicago Center for School Research resulted in a model of learning that shows the interplay of action and reflection as core to learning. In promoting learning, this research highlights the role of making meaning of experience through reflection. (From *Foundations for Youth Success*, 2015).

The graphic above shows how problem solving, initiative, Plan-Do-Review and staff practices that support growth mindset and intrinsic motivation are related. Action is part of both problem solving and initiative. Supporting a growth mindset and tapping into intrinsic motivation by offering young people the opportunity to choose what they are naturally interested in helps them to persevere through challenge.

Quotes on Cognitive Development

- "Cognitive skills and competencies underlie the ability to focus and pay attention; set goals, plan and organize; and persevere and problem solve." ²(p.15)
- "As humans, we are naturally wired for learning" ²(p.14)
- Trauma and adversity "can place our bodies and minds in a constant state of stress or high alert that interferes with learning and growth." ²(p.20)
- "Brain development supports learning and vice versa"¹(p1)
- Physiological preconditions that must be met for optimal brain development and learning:
 - sleep/rest
 - nutrition and low exposure to toxins
 - physical activity, exercise, green space,
 - emotional well-being, social relationships, safety/belonging
 - cultural well-being ¹(p1)

Initiative and Problem-Solving Scenario Sort

SCENARIO 1: Jorge wants to be a champion hotdog eater at the Super Eater contest next year. Which activity goes with each component of the initiative and problem-solving domains? Write the letter of the corresponding component in each box.		
Problem solving: A. Describe problem B. Explore strategies C. Look back and learn	Initiative: D. Take action/Act on Plan E. Sustain motivation F. Persevere through challenge	
Jorge considers several ideas about how to gradually increase the number of hotdogs he can eat in one setting and picks one.	Jorge makes his first attempt at stuffing himself with hotdogs.	Jorge reminds himself that the prize hotdog eater at the county fair wins \$1,000. He writes motivational sayings on his refrigerator.
Jorge reviews his progress and compares which eating method helped him eat more hotdogs.	Jorge gets so tired of eating hotdogs, and friends mock his goal. He wants to give up on his goal of winning the hotdog eating contest, but he sticks to his plan.	After reading blogs on food eating contests, Jorge discovers that he does not currently have the skill or stomach capacity to compete in a hotdog eating contest.

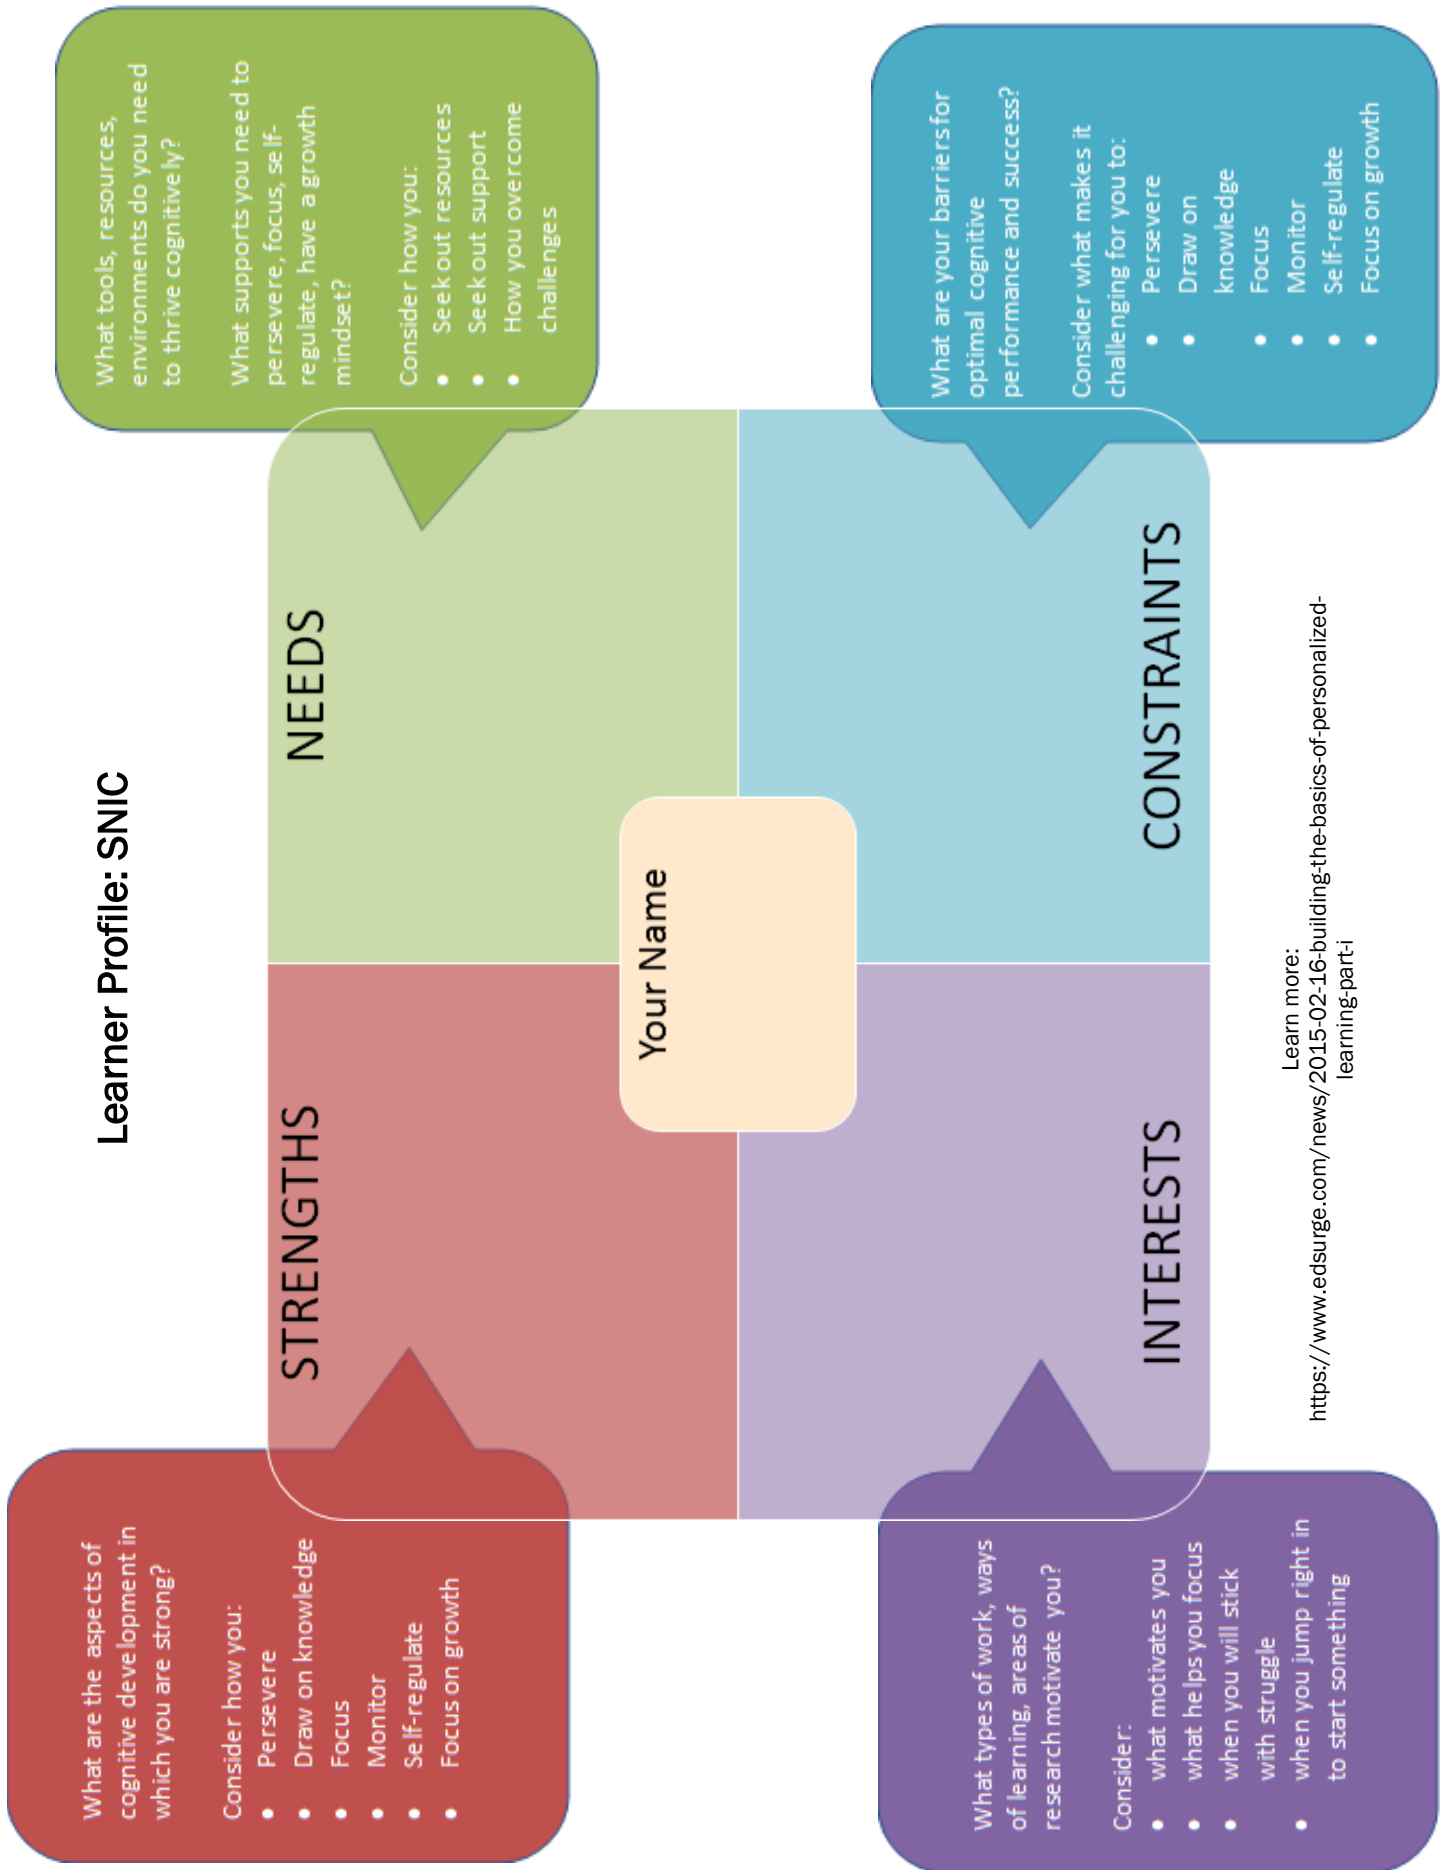

SCENARIO 2: LaTonya wants to organize a reunion of her high school zombie club. Which activity goes with each component of the initiative and problem solving models? Write the letter of the corresponding component in each box.		
Problem solving: A. Describe problem B. Explore strategies C. Look back and learn	Initiative: D. Take action/Act on Plan E. Sustain motivation F. Persevere through challenge	
LaTonya wonders whether the reunion will be worth the effort, but she reminds herself of the friends she's already enjoyed getting in touch with.	When the only venue available for the reunion costs twice what she'd budgeted for, LaTonya has to do some unexpected fundraising to make the reunion happen.	LaTonya uses what she found out about options for hosting a reunion party to backward plan the event.
LaTonya starts the process by contacting the zombie club friends she still connects with to find out how to contact the others.	LaTonya reviews how many RSVPs she has gotten and whether she is keeping up with the schedule she created.	LaTonya writes out what she wants for a reunion and what she already knows and doesn't know about planning a reunion.

Addressing Effects of Stress and Fear

Think about common stress or fear activators people and youth may experience. What impact do these have on the brain or one's ability to function? What can be done to move back into our rational brain? Note your thoughts below.

Stress/Fear Activator	Ways to Address the Impact

Reflection Questions

1. What did this activity show me about my attitude toward learning and problem solving?

2. Experiences that have affected me as a learner include:

Implementation Plan

Goal: _____

Plan-Do-Review	
What is my plan?	
What is the first thing I will do?	
When and how will I review my progress?	
Initiative	
How will I take action?	
How will I sustain motivation?	
How will I persevere through challenges?	
Problem Solving	
Describe the problem: What am I trying to accomplish?	
Explore strategies: What strategy would work best?	
Act on plan: What actions will I take?	
Look back and learn: How will I examine what happened and learn from it?	

Reflection Quotes

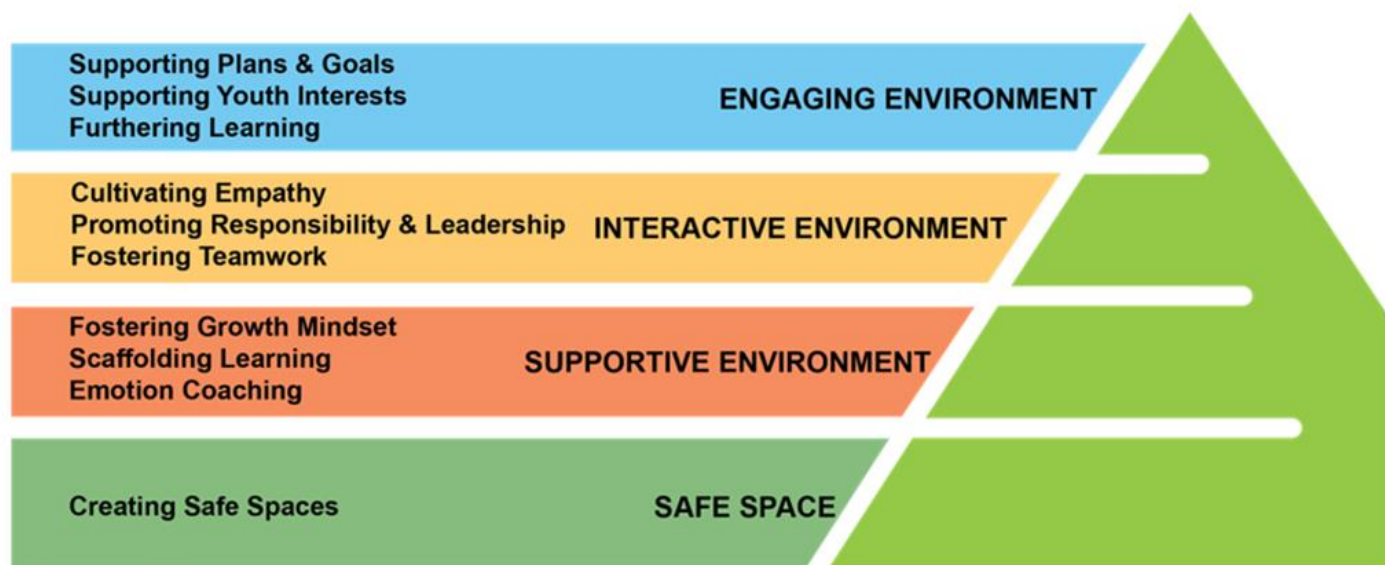

1. **Learning is social and emotional.** Ross Weiner, Aspen Institute
2. **I got my start by giving myself a start.** Madame CJ Walker
3. **A very great vision is needed and the man who has it must follow it as the eagle seeks the deepest blue of the sky.** Crazy Horse, Sioux Chief
4. **Feeling successful is essential. Set mini-goals to get to your larger goal.** Yaneth Medina
5. **Start where you are, with what you have. Make something of it and never be satisfied.** George Washington Carver
6. **Life isn't perfect, any failures you have are actually learning moments. They teach us how to grow and evolve.** Philippa Soo, Actress
7. **Not everything that is faced can be changed, but nothing can be changed that is not faced.** James Baldwin
8. **Every medal I have won is a story of a difficult struggle.** Mary Kom, Olympic Boxer
9. **Do not wait: the time will never be "just right". Start where you stand, and work with whatever tools you may have at your command and better tools will be found as you go along.** Napoleon Hill.
10. **Would you like me to give you a formula for success? It's quite simple, really. Double your rate of failure.** Thomas Watson
11. **Ask 'How will they learn best?' not 'Can they learn?'** Jaime Escalante
12. **You're in charge of your mind. You can help it grow by using it in the right way.** Carol Dweck
13. **It is better to solve one problem five different ways, than to solve five problems one way.** George Pólya
14. **You can increase your problem-solving skills by honing your question-asking ability.** Michael J. Gelb
15. **You're not obligated to win. You're obligated to keep trying to do the best you can every day.** Marian Wright Edelman

Social Emotional Learning Methods Sequence

with *Preparing Youth to Thrive* Domains

Social Emotional Learning Pyramid of Program Quality with SEL PQA Scales

<i>Preparing Youth to Thrive</i>	Youth Work Methods	SEL Methods	SEL PQA
			ENGAGING ENVIRONMENT
Problem Solving	Active Learning	Facilitating Problem Solving	Furthering Learning
			Support connections to previous knowledge
			Link examples to principles
			Encourage extending knowledge
			Encourage logical reasoning
Initiative	Youth Voice		Guide discovery
			Supporting Youth Interests
			Provide open-ended choice
			Provide multiple opportunities for choice
Problem Solving, Initiative	Planning and Reflection	Facilitating Problem Solving	Support creativity
			Supporting Plans and Goals
			Set up planning opportunities
			Ensure young people record or represent plans
			Facilitate monitoring progress toward goal
			INTERACTIVE ENVIRONMENT
Teamwork	Cooperative Learning	Fostering Teamwork	Fostering Teamwork
			Promote active collaboration
			Establish shared goals
Responsibility	Youth Voice	Promoting Responsibility & Leadership	Provide group-process opportunities
			Promoting Responsibility and Leadership
			Assign responsibility for tasks
			Support carrying out responsibilities independently
			Provide mentoring opportunities
Empathy	Building Community	Cultivating Empathy	Provide leadership opportunities
			Provide opportunities to present
			Cultivating Empathy
			Structure activity for sharing and listening
			Encourage understanding other's emotions
			SUPPORTIVE ENVIRONMENT
Management Safe Space (Curriculum Feature)	Reframing Conflict	Emotion Coaching	Structure activities for showing kindness
			Support valuing of differences
			Emotion Coaching
			Acknowledge emotions
			Support young people to name emotions
Responsibility	Active Learning, Intro to Active Participatory Approach	Engaging Youth in Supported Struggle	Discuss constructive handling
			Discuss emotion causes
			Scaffolding Learning
			Break task into steps
			Model skills
Initiative	Ask-Listen-Encourage	Engaging Youth in Supported Struggle	Encourage young people to improve performance
			Monitor challenge level
			Fostering Growth Mindset
			Guide young people to self-correct
			Use non-evaluative language
Safe Space (Curriculum Features)	Building Community, Reframing Conflict	Fostering Teamwork	Attribute achievement to effort
			Creating Safe Spaces
	Building Community, Structure & Clear Limits Reframing Conflict	Fostering Teamwork Cultivating Empathy	Foster positive emotional climate
			Convey warmth and respect
	Building Community	Cultivating Empathy	Provide support for safe space
Demonstrate positive group management style			
			Demonstrate mutual accountability
			Show active inclusion
